Summary

Passionate and driven Front-End Developer with expertise in React.js and modern JavaScript frameworks. Experienced in building responsive, user-friendly web applications, mentoring students, and optimizing UI performance. Adept at debugging and collaborating within cross-functional teams. Actively contributing to open-source projects and seeking a full-time development role to create impactful solutions.

Experience

Freelance React Developer

Dec 2022 - Present

Developed several responsive applications, focused on building scalable, efficient, and user-friendly applications with a strong emphasis on performance optimization and mobile-friendly design.

- **Recipe Finder App:** — [See it in action](#) — Built a recipe search app using TheMealDB API, allowing searches by name, ingredient, or cuisine. Used React hooks & React Router to manage state and navigation, added modals and Dark/Light Mode for a better user experience, and saved 30% in development time by creating a reusable SearchBar.
- **Weather App:** — [See it in action](#) — Built a real-time weather app providing up-to-date information based on user input. Utilized Axios for API requests and React for an intuitive interface, optimizing performance with auto-location detection and a mobile-friendly design. Managed state effectively to minimize unnecessary data fetches.
- **Video Game Explorer:** — [See it in action](#) — Created an interactive platform for exploring games, allowing users to filter and browse by genre and platform. Used React and Zustand for state management, integrating game data via API calls, enhancing user content with descriptions, ratings, and video previews. Optimized rendering by reducing API calls.
- **Expenses Tracker:** — [See it in action](#) — Built an app for tracking and managing expenses, with features for adding, editing, and deleting entries. Implemented Zod for form validation to ensure data accuracy. Utilized React and Bootstrap for improved performance and responsiveness, leading to a better user experience.
- **Vidly Movie Rental App:** — [See it in action](#) — Developed a movie rental platform that allows users to search and rent movies, with filters by genre and rating. Used React and Bootstrap for a responsive UI and React hooks for state management to optimize performance and ensure smooth user interactions.
- **SkyHosting Website:** — [See it in action](#) — Designed and developed a responsive website for a hosting service, improving brand presence. Used OOCSS, SCSS, and AOS animations for a smooth, engaging UI, optimizing the design for mobile-first access to ensure usability across devices.

One Community Global: Developer (Volunteer, HGN Open-Source App)

Nov 2024 - Apr 2025

- Enhanced task management in the Task Tracking project using React, Redux, improving scalability and code maintainability.
- Added a “Tasks” dropdown with conditional rendering based on access permissions, streamlining navigation.
- Used useSelector from React-Redux to track users, enabling accurate task status updates, real-time performance optimization.

Canada International Royal Art College: Web Development Instructor

Sep 2021 - Mar 2025

- Delivered interactive workshops and mentorship in JavaScript and React.js, covering component-based architecture, state management, and performance optimization.
- Guided students through real-world projects, emphasizing dynamic routing, React Hooks, and version control with Git.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS (Sass)
- **Frameworks and Libraries:** React.js, Redux, Next.js, TailwindCSS, Bootstrap
- **Development Tools:** Git, Webpack, Jest, Vitest, Storybook, Figma
- **Test:** JSDOM, HappyDOM
- **Other:** RESTful APIs, Agile Development, CI/CD, UI/UX Best Practices

Education

Web Developer Certificate, George Brown College

Jan 2016 - Jan 2018

BSc. in Computer Engineering, Azad University of Tehran

Sep 1998 - May 2002
