Summary

Passionate Front-End Developer with strong customer empathy, technical troubleshooting experience, and proficiency in React.js and modern web technologies. Adept at building secure, scalable, and user-friendly applications while delivering exceptional customer support. Skilled in guiding clients through technical integrations, troubleshooting complex issues, and optimizing API usage for seamless interactions. Actively seeking a full-time Client Engineer position at Glia to leverage expertise in delivering impactful solutions within the Digital Customer Service platform.

Experience

Freelance React Developer   Dec 2022 - Present

Developed and maintained responsive, user-centric applications, focusing on performance optimization and seamless API integrations. Key achievements include:

– **Recipe Finder App:** — **See it in action** Built a recipe search app using TheMealDB API, focusing on seamless API integration and user-friendly navigation.

– **Weather Forecast:** — **See it in action** Developed a real-time weather app using React, TypeScript, and Axios with a time-sensitive forecast for up to 72 hours. Integrated auto-location detection, dynamic backgrounds (based on weather and time of day), and an interactive map. Added an hourly temperature line chart using Recharts to visualize today's weather trends. Emphasized clean architecture, state management, performance optimization, and full mobile responsiveness.

– **BuiltReminder:** — **See it in action** Developed a task reminder app using React, TypeScript, and the Supabase REST API. Enabled users to add, edit, and delete reminders, demonstrating effective use of React hooks, state management, and Axios for asynchronous data handling. Showcased modular architecture and full CRUD functionality.

– **Video Game Explorer:** — **See it in action** Developed a platform for game exploration with advanced filtering and API integration, improving the user experience by minimizing redundant API calls.

– **Expenses Tracker:** — **See it in action** Implemented robust data validation using Zod and React, enhancing the efficiency and usability of the expense management system.

– **Vidly Movie Rental App:** — **See it in action** Developed a movie rental app, integrating third-party APIs with user-friendly filtering and navigation.

One Community Global: Developer (Volunteer, HGN Open-Source App)   Nov 2024 - Apr 2025

– Worked with customers and partners to integrate Glia's API solutions, troubleshooting technical issues and ensuring smooth integration of web services.

– Enhanced task management features, improving the scalability and maintainability of the codebase using React and Redux, while ensuring excellent customer support.

– Troubleshot API integrations and assisted clients with debugging issues, leveraging RESTful APIs for smooth, seamless operations.

Canada International Royal Art College: Web Development Instructor   Sep 2021 - Mar 2025

– Delivered interactive workshops on building applications using React.js, focusing on debugging and optimizing API interactions.

– Guided students on building scalable web applications, emphasizing best practices for API usage and integration.

Technical Skills

– **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS (Sass)

– **Frameworks and Libraries:** React.js, Redux, Next.js, TailwindCSS, Bootstrap

– **Development Tools:** Git, Webpack, Jest, Vitest, Storybook, Figma

– **APIs:** RESTful APIs, Axios, GraphQL

– **Other:** Agile Development, UI/UX Best Practices, CI/CD

– **Troubleshooting:** Familiar with debugging and troubleshooting network issues, including API integration and performance optimization.

Education

Web Developer Certificate, George Brown College   Jan 2016 - Jan 2018
BSc. in Computer Engineering, Azad University of Tehran   Sep 1998 - May 2002
